

Building Products

Holland manufactures several different construction materials with varying methods of distribution.

Many of the building materials that Holland manufactures are sold through our private label partners such as **Roofing Underlayment**, **Radiant Barrier** and **Flashing**. All private label materials are constructed to the customer's specifications. Holland has the ability to handle 100% of the raw material supply chain or serve as a toll coating/laminating provider.

Building Product Design

Holland has the expertise and laboratory facilities to help develop building products for our private label customers. With access to many different types of substrates, reinforcements and resin technologies, designing a product to a specification and price point are achieved.

| Type | Products | Descriptions | Distribution |
|-----------------------------|---|---|---|
| Roofing Underlayment | Synthetics Asphalt Laminated Self Adhered | Roofing Underlayment provides a moisture vapor barrier between the sub roof and the shingles or metal roofing. | Private Label Only – developed to customer's specifications. |
| Floor Protection | Blue Shield 3518 Blue Shield SW-40 | Reinforced papers provide moisture barrier and tear resistance for temporary floor protection applications. | Available 36" to 96" wide, standard roll lengths 300' and 600'. Jumbo rolls also available. |
| Floor Underlayment | Blue Shield 3030 | Asphaltic Laminated paper used to provide semi-permeable moisture vapor barrier underneath wood or tile flooring. | Available 36" to 96" wide, standard roll lengths 300' and 600'. Jumbo rolls also available. |
| Radiant Barrier | Paper/Foil, Film/Foil | Foil laminations used in construction applications to retain internal temperature. | Private Label Only – developed to customer's specifications. |
| Flashing | Window Door Custom Applications | Flashing provide moisture barriers around windows, doors and other construction openings. | Private Label Only – developed to customer's specifications. |
